### WHOLESALE LIST

#### LINING-OUT STOCK

1941-1942

#### MEMORANDUM

This list has much new material, which will be of real interest to your customers and attract new and desirable prospects. Nothing will make a stronger appeal and increase your sales volume than your reputation for having something unusual to offer, in addition to a well rounded-out line of fresh, well grown general nursery stock.

Now is the time to plan for an increasing future demand by a careful selection of your lining-out stock for immediate canning, potting and planting.

On account of the prospects of immediate **inflation**, wise nurserymen will buy more liberally than usual at present comparatively low prices, and raise a larger and wider selection in anticipation of future increased sales volume and prices.

We feature only quality stock, strictly in accordance with official grades and standards.

**TERMS:**—We will allow discounts of 5 per cent for cash with order or C. O. D.; as well as a quantity discount of 5 per cent on orders of 500 or more of one or more varieties.

Packing at actual cost.

**Non-Warranty**—We give no warranty expressed or implied as to description, quality, productiveness, nor any other matter, of any nursery stock, trees or plants we sell, other than the original price of the stock at the date of sale.

This list cancels all previous issues. Prices subject to change without notice.
